

1.Missing Database Driver

```
{
  dbError: "Database unavailable - please try later or contact your administrator. Problem getting driver:com.mysql.jdbc.Driver.test",
  gameTableList: [ ]
}
```

I got this error by including a driver that was not in the NetBeans project.

```
{
  dbError: "Database unavailable - please try later or contact your administrator. Problem getting connection:Communications link failure The last packet sent successfully to the server was 0 milliseconds ago. The driver has not received any packets from the server.",
  webUserList: [ ]
}
```

[+ - View source](#)

This one I wasn't tunneled in and was trying to access data from the server.

```
{
  dbError: "Database unavailable - please try later or contact your administrator. Problem getting connection:Access denied for user 'tuj55083'@'cis-linux2.temple.edu' (using password: YES)",
  gameTableList: [ ]
}
```

This one was achieved by not having the correct credentials

```

{
  dbError: "",
  - webUserList: [
    - {
      webUserId: "",
      userEmail: "",
      userPassword: "",
      image: "",
      birthday: "",
      membershipFee: "",
      userRoleId: "",
      userRoleType: "",
      errorMsg: "Exception thrown in WebUserView.getAllUsers(): You have an error in your SQL syntax; check the manual that corresponds to your MySQL server version for the right syntax to use near 'where web_user.user_role_id = user_role.user_role_id ORDER BY web_user_id' at line 1"
    }
  ]
}

```

Just took away the space between the last element and FROM and it became a syntax error.

```

{
  dbError: "",
  - gameTableList: [
    - {
      gameId: "",
      gameName: "",
      releaseDate: "",
      price: "",
      genre: "",
      developer: "",
      img: "",
      webUserId: "",
      userEmail: "",
      errorMsg: "Exception thrown in GameView.getAllGames(): Unknown column 'user_email_error' in 'field list'"
    }
  ]
}

```

Entered a column that didn't exist in the database.

```

{
  dbError: "",
  - gameTableList: [
    - {
      gameId: "1",
      gameName: "bad date in FormatUtils.formatDate: Shovel Knight. Error: java.lang.String cannot be cast to java.util.Date",
      releaseDate: "06/26/2014",
      price: "$30.00",
      genre: "Adventure",
      developer: "Yacht Club",
      img: "pics/shovelKnight.jpg",
      webUserId: "6",
      userEmail: "ab@gmail.com",
      errorMsg: ""
    },
  ]
}

```

Formatted a string into a date when getting the table contents.
